Profile

Computer Engineering student at ESI-SBA with hands-on experience in frontend and mobile development through award-winning software engineering projects. Experienced in developing responsive web applications using React, Next.js, TypeScript, Flutter, and modern UI technologies. Passionate about software engineering, AI, Quantum computing and building impactful digital solutions from design to deployment.

Education

Higher School of Computer Science (ESI SBA)

Computer Engineering Undergraduate (4th Year)
Expected Graduation: June 2028

Sidi Bel Abbès, Algeria
2023 – Present

Technical Skills

Programming Languages

Java • Python • JavaScript • TypeScript • C • SQL (MySQL) • R

Frontend

React • Next.js • HTML • CSS • Tailwind CSS • Material UI • Framer Motion

Mobile Development

Flutter

Backend

FastAPI • Django • REST APIs • JWT Authentication

Software Engineering

Git • GitHub • Docker • Agile • Scrum • UML • OpenAPI (Swagger)

AI & Data Science

Pandas • NumPy • Matplotlib • Scikit-learn

Developer Tools

VS Code • Cursor • IntelliJ IDEA • Eclipse • NetBeans • Figma • Canva • CapCut

Additional Knowledge

Responsive Design • Internationalization (i18n) • RTL Support • Quantum Computing • Qiskit

Experience

Software Engineering Project – CheckIn

2026

Frontend & Mobile Developer

- Contributed to the development of an award-winning university management platform that secured **1st place in its competition theme**.
- Led the development of a significant portion of the frontend using **Next.js, React, TypeScript, and Tailwind CSS**, delivering modern, responsive, and reusable user interfaces.
- Developed the cross-platform mobile application using **Flutter**, ensuring a seamless experience across web and mobile platforms.
- Designed the login page and contributed to the overall UI/UX design and software architecture.
- Implemented multilingual support (English, Arabic), RTL layouts, and light/dark themes.

- Integrated REST APIs secured with JWT authentication for communication with backend services.
- Contributed to the implementation of features including attendance management, timetable visualization, absence tracking, online justification requests, and examination workflows.
- Participated in the conception of the software architecture and system components alongside the development team.
- Authored and reviewed several software engineering deliverables, including:
 - Software Requirements Specification (SRS)
 - UML Design Documentation
 - Architecture & Deployment Documentation
 - API Documentation (OpenAPI / Swagger)
 - Project Management Documentation (PERT, Gantt, Risk Analysis, Sprint Planning)
 - Mobile Deployment Guide
- Collaborated within an Agile development environment using Git and GitHub for version control.

Quantum Computing Workshop & Mini Hackathon

2026

AI & Quantum Community (AiQC)

- Completed an intensive 14-hour workshop covering quantum computing fundamentals, quantum circuits, quantum gates, and Qiskit.
- Ranked **3rd** in an individual technical assessment involving quantum computing concepts and problem solving.
- Participated in a five-hour team hackathon focused on solving practical problems using newly acquired quantum computing knowledge.
- Strengthened analytical thinking, mathematical reasoning, and teamwork in a fast-paced technical environment.

Research Paper Analysis – PK/PD Modeling

2025

AI & Quantum Community (AiQC)

- Conducted a comprehensive technical analysis of a scientific research paper on Pharmacokinetic/Pharmacodynamic (PK/PD) modeling.
- Studied the mathematical models, methodology, experimental results, and practical applications presented in the paper.
- Produced a structured technical report summarizing key findings while improving scientific reading, research, and technical writing skills.

Projects

Collaborative Whiteboard Platform

2025

Next.js • React • TypeScript • Tailwind CSS

- Developed a collaborative web platform that enables students and teams to create, organize, and share digital whiteboards for learning and teamwork.
- Built a responsive and intuitive frontend using React, Next.js, and Tailwind CSS with reusable component-based architecture.
- Designed a classroom-based organization system allowing users to categorize whiteboards by classes, favorites, and teams.
- Implemented responsive layouts, and modern UI/UX principles to ensure accessibility across devices.
- Developed features for creating, editing, saving, searching, and organizing whiteboards, providing an efficient digital workspace for collaborative learning.
- Collaborated with teammates using Git and Agile development practices throughout the project lifecycle.

CheckIn – Smart University Attendance Platform

2026

Next.js • React • Flutter • TypeScript • Tailwind CSS

- Developed both web and mobile interfaces for a university attendance and academic management platform.

- Implemented responsive dashboards supporting administrators, teachers, students, and academic staff.
- Added multilingual support (French, English, Arabic), RTL layouts, and dark/light themes.
- Integrated secure JWT-based authentication and REST API communication.
- Contributed to facial-recognition attendance workflows, timetable management, absence tracking, and online justification requests.

Awards

1st Place – CheckIn Software Engineering Project 2025

Awarded for developing the best project in our competition theme.

3rd Place – Quantum Computing Technical Assessment 2025

Achieved 3rd place among workshop participants during the AI & Quantum Community intensive quantum computing training.

Leadership & Community Involvement

Organizer & Host – AIQuest Quantum Edition (GDG SBA) 2025

- Organized and hosted AIQuest Quantum Edition, contributing to the coordination of participants, event logistics, and technical activities.

Organizer – Rubik’s Cube Tournament (GDG SBA) 2025

- Assisted in organizing a university-wide Rubik’s Cube competition, managing event logistics and participant coordination.

Technical Team Member – Ingeniums SBA 2025 – Present

- Contributed to the development of the organization’s official website as part of the technical team.

Member – AI & Quantum Community (AQC) 2025 – Present

- Participated in research activities, technical workshops, hackathons, and collaborative problem solving projects focused on Artificial Intelligence and Quantum Computing.
